

Page Layout

The Edit Layout option allows you to determine the number of columns and the sizes for a page. Each page will have its own layout.

Edit Content Edit Title and Description **Edit Layout** Display page » Share page »

Select how you would like the columns in your page to be layed out.

1 column

Equal widths

2 columns

Equal widths Larger left column Larger right column

3 columns

Equal widths Larger centre column Much larger centre column

4 columns

Equal widths Larger centre columns

5 columns

Equal widths

Choose the desired layout and click Save

Save

The screenshot displays the 'Edit Layout' section of the Mahara interface. At the top, there is a navigation bar with tabs for 'Edit Content', 'Edit Title and Description', 'Edit Layout' (which is active), 'Display page »', and 'Share page »'. Below the navigation bar, a message states 'Select how you would like the columns in your page to be layed out.' The main area is organized into rows based on the number of columns: 1 column, 2 columns, 3 columns, 4 columns, and 5 columns. Each row contains one or more icons representing different width distributions, with labels below them. For 1 column, there is one icon labeled 'Equal widths'. For 2 columns, there are three icons: 'Equal widths', 'Larger left column', and 'Larger right column'. For 3 columns, there are three icons: 'Equal widths', 'Larger centre column', and 'Much larger centre column'. For 4 columns, there are two icons: 'Equal widths' and 'Larger centre columns'. For 5 columns, there is one icon labeled 'Equal widths'. Each icon is a small window with a green interior and a blue border. To the right of the layout options, a text box says 'Choose the desired layout and click Save' with two arrows pointing to the layout icons and the 'Save' button. The 'Save' button is a small grey rectangle located at the bottom left of the layout selection area. A long black arrow originates from the text 'Choose the desired layout and click Save' and points directly to the 'Save' button.
